

Dear friends!

We are EcoDefense NGO, working in Russia, and addressing you as we seek for a Nordic NGO to possibly become a partner in our project aimed to study and protect the avenues of Kaliningrad region.

The project is going to be collaboration and good practices transfer between Ecodefense, our existing Polish partner, and our possible Nordic partner in order to save the avenues of Kaliningrad region as a part of historic European heritage and cultural and natural landscape.

We need experts in botany, dendrology, arboriculture, landscape architecture, environmental education, school involvement, who would be interested in our proposal to visit Kaliningrad region to participate in investigation of the avenues to make provisions for their legal protection, and in an international conference on avenues. We also plan to produce a publication dedicated to avenues. For more details on the project please see the attached project summary.

We are going to submit the project application to the NGO Support Program of the Nordic Council of Ministers. The deadline for submissions is October 15, 2017. The program does not require co-financing by the project partners. Only nongovernmental organizations are eligible as project partners under the program.

Hope you find our proposal of interest for you and look forward to hear from you.

Alexandra Koroleva, Ecodefense, Kaliningrad, Russia
