ABOUT

The CPMR Baltic Sea Commission, EuroRegion Baltic, CBSS Baltic 2030 and Baltic Sea Future proudly presents a one day workshop and networking event for Maritime Regions and Municipalities in the Baltic Sea Region.

Energy Transition in Baltic Sea Region is a one-day workshop, specifically designed for decision-makers and change agents that are working on regional development and are interested in understanding how to achieve sustainable energy transition in the Baltic Sea Region, by serving and using the Sustainable Development Goals (SDGs) in every day planning and concrete action.

The aim of this workshop is to help pave the way for increased cooperation and engagement between local and regional authorities as well as other relevant stakeholders, in their work towards the transition to a low-carbon economy in the Baltic Sea Region. We will also try to identify and find ways to overcome some of the challenges and obstacles these authorities encounter in this ambitious task.

The main target group for the workshop is regional politicians working with regional sustainable development issues as well as civil servants working in the field. Additionally, to have more diversity, we would like to invite youth representatives, as well as representatives of business and academia. We expect approximately 20 in the seminar. Member Regions and Municipalities of the CPMR Baltic Sea Commission and ERB are invited, together with experts on sustainable development in the Baltic Sea Region countries.

Meeting venue
HOTEL SANDVIG
Strandvejen 99
3770 Allinge
Bornholm, Denmark
