Future of Public Transport – Trends – Tools – Governance

INVITATION

INTERCONNECT FINAL CONFERENCE

FUTURE OF PUBLIC TRANSPORT TRENDS – TOOLS – GOVERNANCE

1 OCTOBER 2020, 10.00-15.30 CET
ONLINE CONFERENCE

We hereby invite project partners, associated organisations and other stakeholders to the Interconnect Final Conference.

Background

Interconnect, a EUSBSR flagship, addresses the challenge of curbing the car-reliant mobility trend in the South Baltic area through user adjusted and more sustainable public transport services for regional and cross-border travels. To enhance car-independent mobility in the South Baltic area, the partnership consisting of nine formal partners from six countries carries out joint capacity-building, pilot demonstrations and advocacy actions.

Key profile of the conference

Through the final event, the project aspires to reach the relevant target groups with the outcomes of thematic activities in such areas as: *Market needs for regional and cross-border public transport, Sustainable visions and paths for public transport, Planning models and new tools for public transport and Guidelines on multi-level governance for public transport in the South Baltic area.*

Register your participation in the conference by filling out the questionnaire with contact details [here](#) and we will send you a registration link to the online event platform  **hopin** together with practical information, approximately two weeks before the event.

Looking forward to meeting you on the conference!
Keep in touch online!
